

Printing flexible plastics can be a bit different than other projects you've set up. Everything we do is made to order! Size, material, configuration, features. We want your project to be a total success. Here are some useful guidelines for setting up your art:

Art Specifications:

• MAX COLORS: 10 (including white). Ideally keep colors under 8.

- Develop art using Adobe Illustrator. PSD and other formats can be used, but AI is best.
- Avoid placing critical graphics in zipper area, seal zones, or around hang hole (i.e: USDA icons, bar-codes, regulatory compliance information)
- Vector line art for all text and graphics (critical)
- Avoid putting clear windows/see through areas in a seal zone or gusset seal areas
- Apply all affects. Please do not create traps.
- Remove all unused layers, please do not hide or turn off layers on final art.
- LINE WEIGHT: Horizontal 0.6 point. 1.25 Point if reversed. Vertical: 0.46 point. 1.00 Point if reversed.
- LINE SCREEN: 177 Line screen based on 300 DPI imagery • UNDER 15% SCREEN: Must eliminate from CMYK mix or convert to 100% spot

300dpi CMYK & linked.

Type Specifications: • MINIMUM TYPE SIZE: Positive - 3 point bold; Reversed -

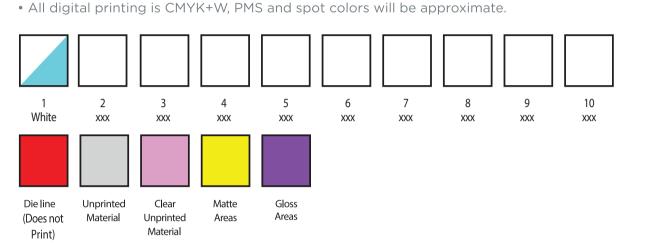

- Outline all type.
- Do not use Photoshop for Typesetting or use Smart Objects that require spot color or trapping.

Bar-code Specifications:

- Size: between 80% and 120% suggested not to
- Must be line art. Placed PNGs are not sufficient.
- QR Codes: recommended size 20x20 mm; contrast ideally black and white.

Color Specifications:

- WHITE INK: counts as a color. • BLACK: use 100% Process Black ONLY for text, solids, drop shadows, and bar-codes.
- SPOT COLOR: must be designated with Pantone "C" or "U" deck colors best for colored type, line, large solid,
- PMS COLOR: http://www.pantone.com or Pantone Connect available on Adobe CC.
- PRODUCT WINDOW & UNPRINTED MATERIAL: Use the swatches provided in the color bar.
